

hexnode uem

The device management solution you need

U N I F I E D E N D P O I N T M A N A G E M E N T

ABOUT US

Hexnode UEM is an award-winning Unified Endpoint Management solution adopted by businesses to manage endpoints from a centralized console.

State-of-the-art capabilities to secure, track, and manage corporate-owned as well as personal devices.

Solutions

Hexnode UEM is your one-stop solution, addressing all your IT needs.

Mobile Device Management

Securely manage mobile devices.

Unified Endpoint Management

Holistic multi-platform device control.

Identity and Access Management

Control user access securely.

Enterprise Mobility Management

Comprehensive mobile device oversight.

Remote Monitoring and Management

Remote IT system supervision.

App Management

Efficiently oversee applications deployment.

With Cross-Platform Support

✓ Windows

✓ macOS

✓ Android

✓ iOS

✓ tvOS

✓ Fire OS

Zero-touch enrollment options

Devices can be remotely set up, ensuring they are fully configured for work right from the initial boot.

- ▶ Apple Automated Device Enrollment
- ▶ Windows Autopilot
- ▶ Android Zero-touch Enrollment
- ▶ Samsung Knox Enrollment
- ▶ ROM - based Enrollment

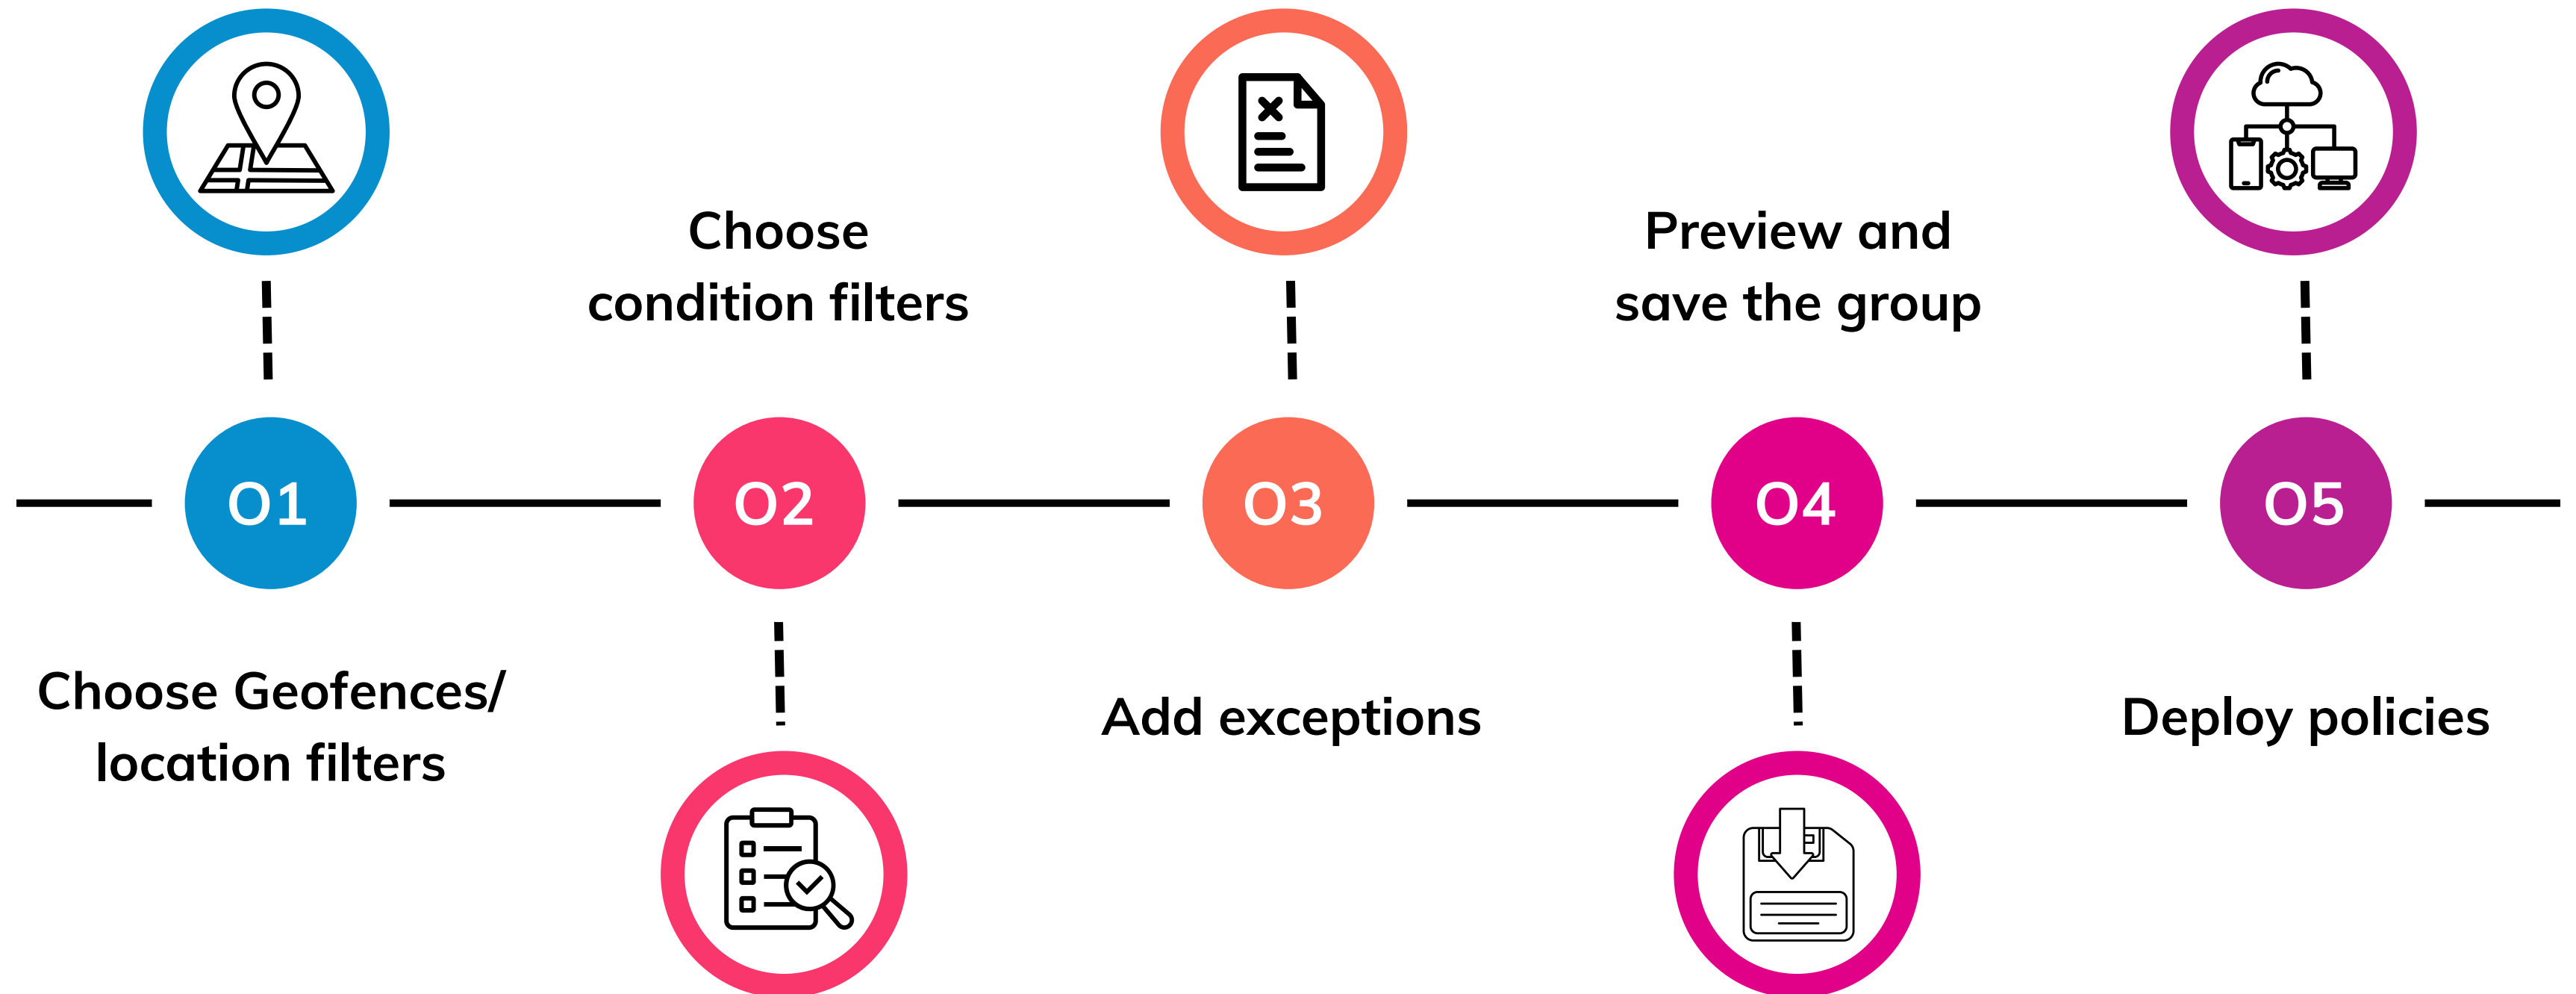

Smart device and user groups

Set conditions to automate management of devices with dynamic grouping.

Devices and users can be automatically grouped on the basis of conditions such as location, device mode, user role, compliance status, etc.

Dynamically grouping and managing

Groups based on

- ▶ Location
- ▶ Device information
- ▶ User information
- ▶ Operating system
- ▶ Network information
- ▶ Compliance information

Kiosk management

Set up secure kiosks in minutes with a single app in action or with multiple apps.

Hexnode comes with advanced kiosk configurations such as;

- ▶ App and web based kiosk lockdowns
- ▶ Kiosk browser
- ▶ Remote security actions

Unlock the following capabilities with Hexnode Kiosk

- ▶ Digital signages and advertising
- ▶ Point-of-sale terminals
- ▶ Self-service kiosks
- ▶ Public information displays
- ▶ Dedicated devices (in industries like hospitality, healthcare, logistics)

BYOD management

Provide the best of both worlds - Privacy and Security, for your personally managed devices.

- ▶ Deploy “containers” to securely separate work apps and data from personal apps and data.
- ▶ Onboard personally managed devices with iOS user enrollment and Android Enterprise.
- ▶ Cut down on the hassle by using pre-assigned or directory (AD, Azure AD, Okta and Google users) passwords to enroll

Remote monitoring

Stay on top of your assets, wherever they are, with Hexnode's entire suite of RMM capabilities

- ▶ Remote monitoring of device health and status
- ▶ Automated remote policy deployment
- ▶ Remote assistance and troubleshooting
- ▶ Security management
- ▶ Remote OS patch management

More control with automated script execution

With Hexnode UEM's Scripts policy, IT admins can automate the execution of scripts during every device startup effortlessly.

- ▶ Delegate repetitive tasks
- ▶ Effectively utilize time & resources
- ▶ Manage system configurations
- ▶ Software and app updates

Device encryption

Hexnode provides a centralized way to configure device encryption software to your corporate devices in bulk.

- ▶ BitLocker (for Windows)
- ▶ FileVault (for Apple devices)
- ▶ Android device encryption

Policy deployment

Configure specific policies to ensure that the devices are fully secure and managed.

- ▶ Password restrictions
- ▶ Network configuration
- ▶ Device functionality restrictions
- ▶ Application management
- ▶ Web content filtering
- ▶ Identity and Access management

More features offered by Hexnode

- ✓ Security management
- ✓ Device dashboard
- ✓ BYOD management
- ✓ Location tracking
- ✓ Rugged device management
- ✓ Scheduled reports

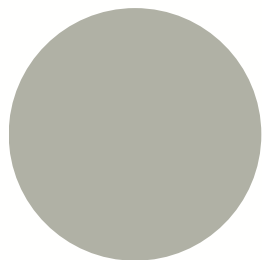

Our Vision

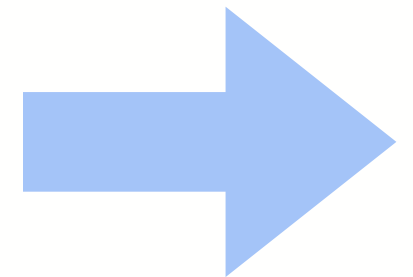

We see a world where every connected device, from smartphones to desktops, is effortlessly managed and protected. No more juggling complex tools or worrying about vulnerabilities.

We, at Hexnode, are building the bridge between IT and your devices, making security and management so simple, it feels like magic.

Here's a quick walkthrough of deploying Hexnode in your organization.

And you are all set!

Hexnode is making waves around the world

IDOOH

"Saving us the time
installing application
manually on a single tablet."

-Jan Mari Pano
IT at IDOOH

Skyline Dynamics

"We can see the battery
level for the iPads and we
can send customers alerts if
the iPad is about to go
offline with Hexnode"

-Hamza Whitmore
CTO

Varari Solutions

"Recommended highly for
simple cloud base
implementation.
Straightforward to use."

-Ziad Al-Masri
CMO and co-founder

Trainspot

"Hexnode is much simpler
than the other MDMs that
we've used"

-Malik Kusters
Founder
