Unified Endpoint Management

Multi platform and devices support

A single console to control diverse range of operating systems and devices

Why Hexnode UEM?

Your device management challenges require a top-tier solution. Hexnode UEM helps you cover every possible aspect with a comprehensive set of tools.

Here is what you've been missing out

- **Easy Onboarding**

Hexnode offers a wide range of options to onboard your devices. Whether you are new to the landscape of device management, or shifting from an existing solution, Hexnode ensures the process will be smooth and hassle-free!

- **BYOD, COPE, CYOD or COBO**

Hexnode ensures seamless device management in any scenario. Its containerization capabilities keep corporate and personal data separate, while work profiles on BYOD, CYOD, and COPE devices give you complete control.

- **Multi-OS and Multi-DeviceSupport**

Unlock support for an extensive list of device models and Operating systems from a single platform. Supporting iOS, macOS, AppleTV, Android, Windows, ChromeOS, Linux, FireOS, VisionOS and an array of devices from desktops to peripherals, Hexnode manages it all.

- **Kiosk Mode for Every Platform**

Turn any device into a restricted secure workspace. Lock down your entire fleet of Apple, Android and Windows devices to limited applications and functionalities. Hexnode supports single and multi app modes, along with web-based kiosks to lock down your device to web-based apps and URLs.

• AI Assistant

Hexnode Genie makes device management easier with its AI-powered assistant. IT admins can create scripts for Windows, macOS, and Linux using simple language—no coding expertise needed. This low-code solution streamlines troubleshooting and boosts efficiency.

• Flexible Pricing Plans

Hexnode offers a range of pricing plans that are tailored for all your corporate needs. Make use of the features in both on-premise and cloud versions, for the same price. Better yet, you receive comprehensive documentation on setting up your on-premise Hexnode UEM.

• Absolutely No Training Required

Here, at Hexnode, we believe in minimalism. We have sought, and found, ways to replace multiple steps, that you would have to stumble through with other UEM providers, to a single step. Detailed help documentations and a world class support team ensure that the wheels keep turning.

• Easy Migration to Hexnode

Hexnode Gateway streamlines the migration of Windows and macOS devices, ensuring a smooth transition with minimal downtime. Automate the process, maintain control, and reduce errors with real-time device management. Secure onboarding with encrypted configurations and user authentication ensures robust security and compliance.

- **Get Compliant with Hexnode**

Hexnode has a comprehensive repository of documents that can help you get compliant with modern compliance standards. These expert-prepared documentations can give you a head start in your journey to being GDPR, SOC 2, PCI DSS or HIPAA compliant.

GDPR || **SOC 2** || **PCI DSS** || **HIPAA**

- **Unified Policy Management**

Access, review, modify and assign all your policies from a single place to attain harmonious policy management. Define restrictions and management functionalities for all your devices in a single policy and assign them to individual devices or device/user groups.
