

hexnode uem

UNIFIED ENDPOINT MANAGEMENT

Hexnode recognized in Gartner Midmarket Context:
Magic Quadrant for UEM 2021

Forrester includes Hexnode as a mobility specialist
in the Now Tech: Unified Endpoint Management,
Q2 2019 report

Unified Endpoint Management

Manage phones, tablets, laptops, PCs, Smart TVs & Smart watches, ruggedized and IoT devices – all from a single pane of glass.

One common, platform-agnostic policy for all devices.

Monitor, track & secure endpoints. Distribute apps and content.

Business Solutions

Multi-OS Device Management

Content Management

Identity and Access Management

Application Management

Mobile Security

BYOD Management

Device Management

Secure, manage and monitor complete device lifecycle- on-boarding to retirement.

Support for multiple device ownership models- corporate-owned, BYOD, Kiosk, LOB and more.

Low-touch high volume deployment support.

Application Management

Centralized multi-platform application deployment across endpoints managed by the organization.

Distribute, manage, update, track inhouse (enterprise), public and purchased apps across endpoints.

Recommend apps to users via app catalog, containerize apps, whitelist or blacklist apps, prevent app backups, force app installation, configure app layout, restrict access to app store and more.

Content Management

Increase corporate productivity without compromising security.

Seamless content collaboration across teams.

Secure access to corporate emails, calendars, contacts and applications, strong DLP policies to prevent corporate data leakage to users.

Identity & Access Management

Seamless integration with Microsoft Active Directory, Azure AD, G Suite and Office 365 to provide secure access to user data

Automatic and continuous compliance checks to identify non-compliant devices.

App catalogs to provide instantaneous access to required apps.

BYOD Management

Secure encrypted storage space to isolate corporate apps and data from personal apps and data on BYO devices.

Push apps, enforce app-specific configurations and permissions, enforce data security settings to containers on devices.

Corporate wipe to ensure that only managed documents and apps are wiped from the personal device. Prevent sharing of sensitive information outside of the work profile by enforcing copy/paste restrictions on devices and more.

Mobile Security

Lock devices in single/multi app kiosk mode, restrict access to settings, enforce password complexity and end-to-end device encryption.

Enforce certificate-based authentication, configure policies for Wi-Fi, email, VPN to ensure secure access to corporate resources.

Containerization of apps and data, blacklist apps, enterprise device wipe, corporate wipe are few of the security control functions available.

Business Capabilities

Competitive Differentiation

Simplified Management

Unified Policies

User Centric Device Management

Support for multi-OS endpoint ecosystem

Scalable Endpoint Configuration

Flexible Pricing Plans

Day one support for all major OS releases

Hexnode uses Hexnode

We have extensively implemented Hexnode UEM throughout all our offices. Security is at the heart of everything we do and Hexnode's architecture is designed to follow modern compliance standards and privacy regulations.

Get Compliant with Hexnode

Hexnode has a comprehensive repository of documents that can help you get compliant with modern compliance standards. These expert-prepared documentations can give you a head start in your journey to being [GDPR](#), [SOC 2](#), [PCI DSS](#) or [HIPAA](#) compliant.

Western Airways: Flying high on turbocharged MDM

Industry
Airlines

Location
Texas

Devices
iPads

Western Airways used Hexnode MDM to provision iPads to cabin crew and empower them with a slew of apps rolled out via the integrated Apple Volume Purchase Program

Andalusia Hospitals: Improving care delivery & clinical work-flows with secure mobility

Industry
Healthcare

Location
Jeddah

Branches
9

Top notch customer service. Whatever my region time, I find someone answering me and giving support. MDM with awesome mobile tracing system. For that I recommend Hexode.”

MOHAMED YAHIA ABDELKADER
IT System Administrator, Andalusia Hospitals

Bathstore: Revolutionizing retail marketing with augmented reality, mobile kiosks & MDM

Industry
Bathroom retail

Location
UK

Devices
Android

Using Hexnode MDM, Bathstore has seamlessly deployed tablets across 150 stores in the UK, pushing app updates, deploying company wall-papers and configuring devices to be more work-specific.

Consec Security: Securing patrol devices with Hexnode's Single App Kiosk mode

Industry
Security

Location
Australia

Devices
Android

Hexnode's single app kiosk mode has allowed Consec Security to lock down their devices to a single app and thus ensure that their devices are used strictly for work purposes only.

Hartley ISD: Teaching made fun with learning apps deployed by Hexnode MDM

Industry
Education

Location
Texas

Devices
iOS

Bringing all the iPads which were deployed to the staff under the single Hexnode MDM console put a big dent in the admin's workload. Teachers had their apps delivered to their devices with zero waiting time.

Millennium Hotels and Resorts: Streamlining Mobile Kiosk Management across 13 hotels from a single console

Industry
Hospitality

Location
North America

Devices
iOS & Android

The hotel deployed devices were successfully enrolled and managed with Hexnode MDM. The Hexnode Kiosk turned out to be the perfect solution meeting their requirements.
