

# Everything you need to know about Android Enterprise

## 2.5 billion

monthly active  
Android users

## 85%

share in the global  
mobile OS market

**Android Enterprise** is a Google-led initiative that enables the use of Android devices and applications in the work environment. It provides a set of consistent APIs to manage and secure Android devices for corporate usage.

## Android Enterprise features

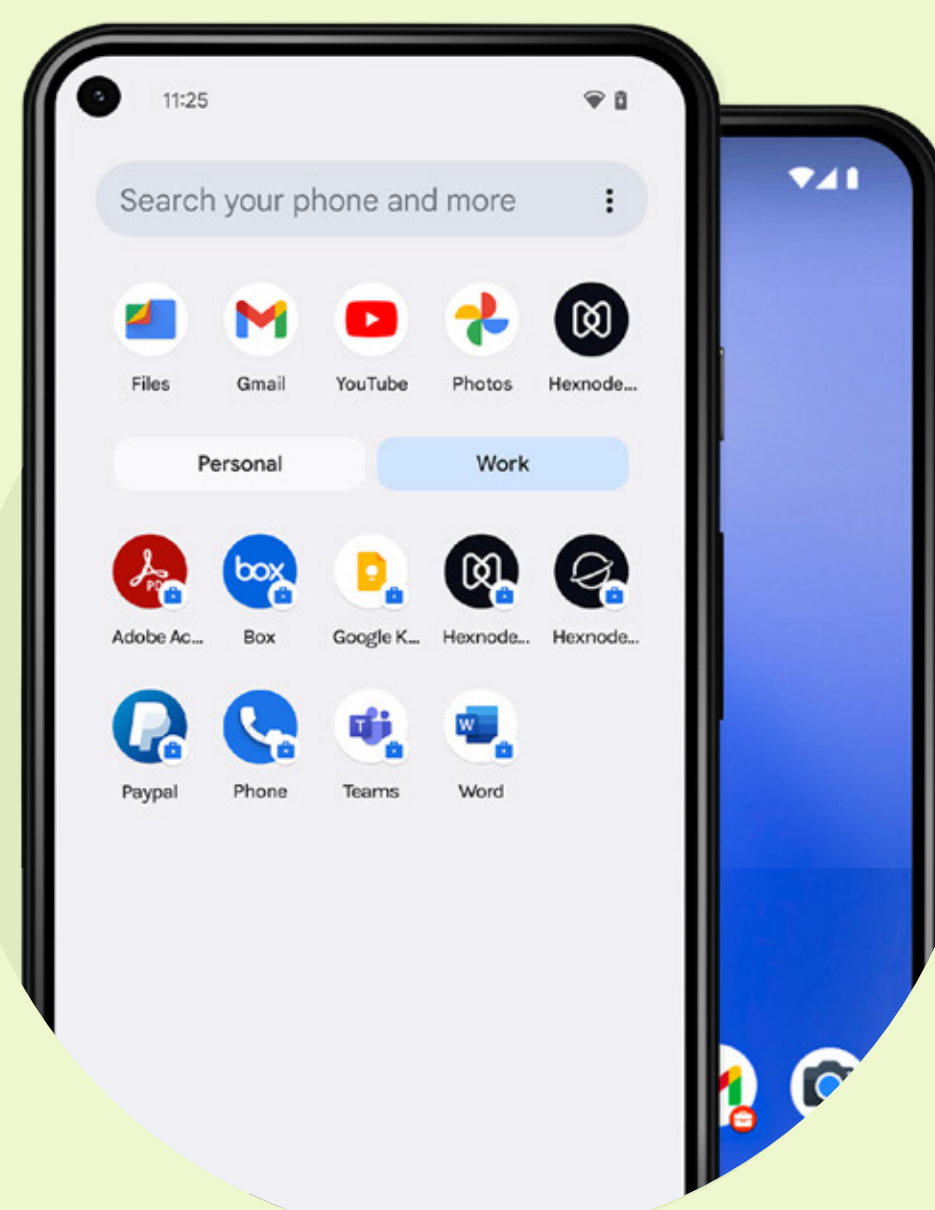

Android Enterprise allows you to secure, manage and unify Android devices within your organization.

Separate work and personal data to enhance security and embrace BYOD.

Securely distribute and manage both store apps and enterprise apps using custom app store.

## What is Android Enterprise Recommended?

Android Enterprise Recommended provides a list of devices, EMMs and MSPs recommended by Google that satisfy the enterprise-specific requirements, benefitting both the client organization and the OEMs involved.

Deploy devices in bulk with **Zero-Touch Enrollment**

**Managed Configurations** let IT admins remotely specify settings for apps

Managed Play Store with management capabilities, for IT admins to establish an enterprise Play Store
