

# Driving ROI using Hexnode UEM

Hexnode UEM consistently stands out by delivering added value to its users. It enhances productivity, and streamlines operations, resulting in an impressive ROI that can truly transform your business.

Apart from these, there's a lot more!  
With the same setup, you'll also have:

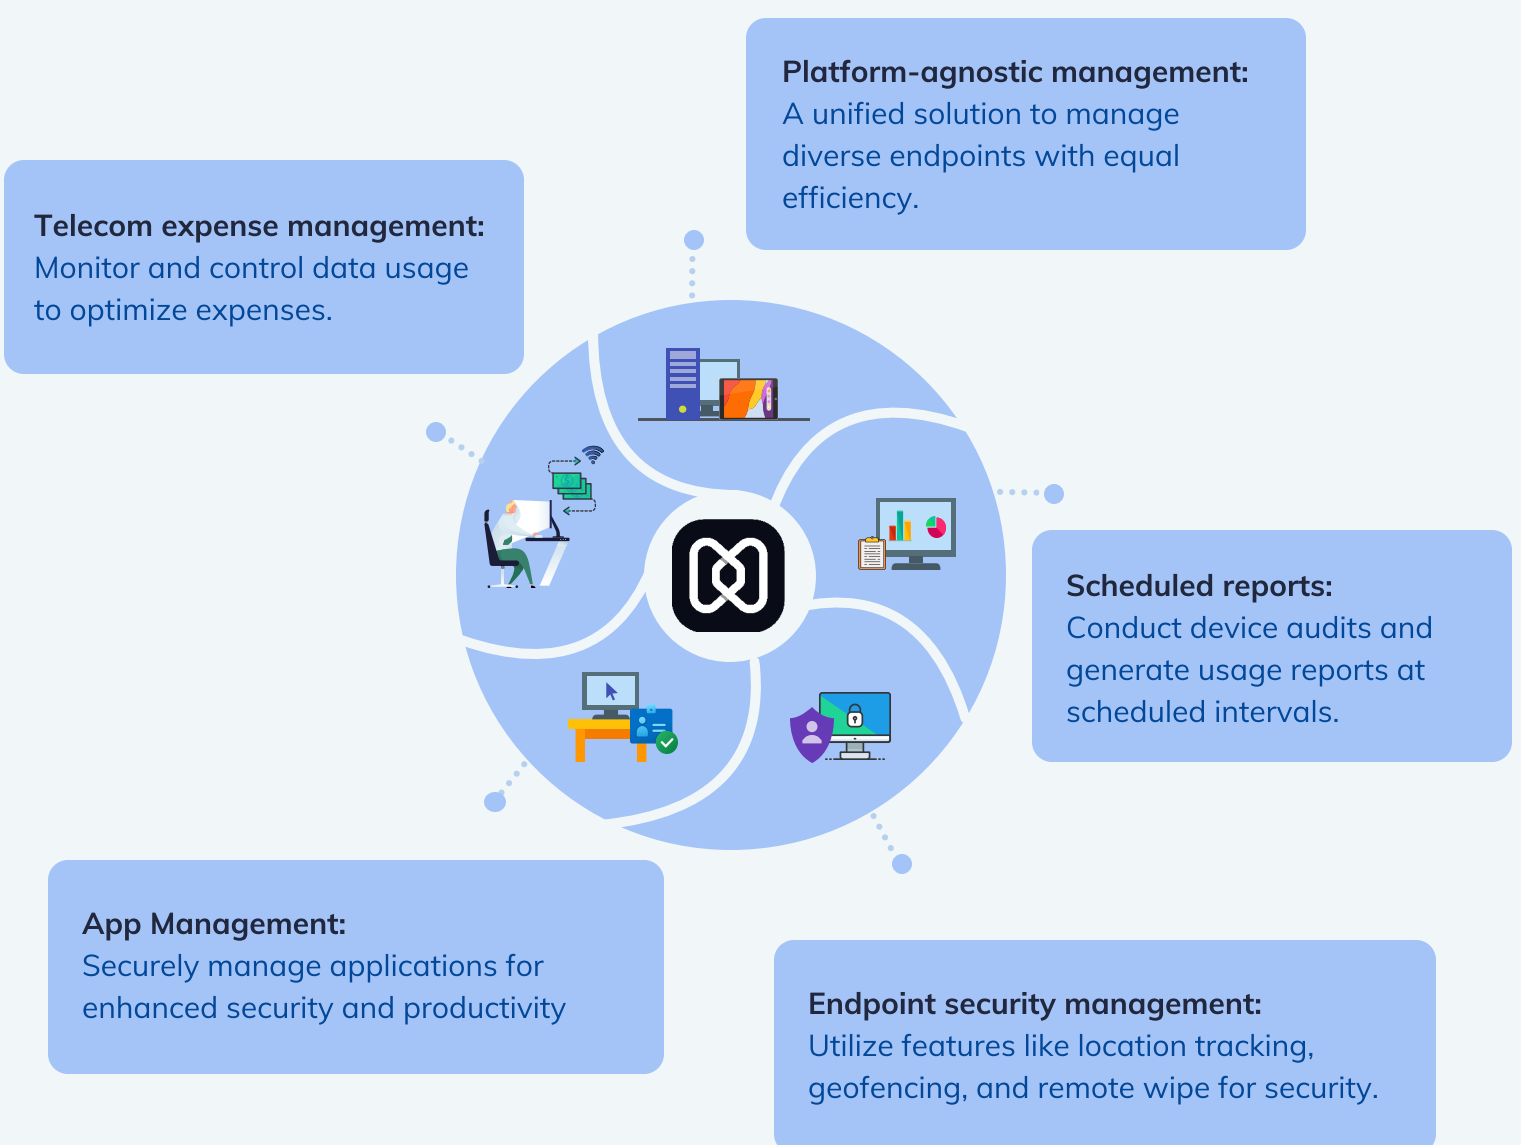

- Payback in just **3 months**
- An exceptional **338% ROI**
- \$159,388** annual gross savings

\*Calculations follow industry norms: 100 devices, IT admins working 6 hrs/day, 5 days/week at \$40/hr.

## ROI benefits from a UEM solution

- Sustainability**  
 ROI ensures that your organization's investments yield sustainable returns, allowing for long-term growth and stability.
- Competitive advantage**  
 A strong ROI indicates effective use of resources, giving your organization a competitive edge in the market.
- Time-to-Market acceleration**  
 UEM expedites the deployment of new technologies and applications, helping your organization seize market opportunities faster.
- Cost optimization**  
 UEM reduces the total cost of device management by automating processes, thus leading to improved ROI.
